PROFESSIONAL SUMMARY

Full-stack developer specialising in Java, Jakarta EE, TypeScript, Angular, and React, with strong experience building back-end services, REST APIs, and end-to-end product features. Experienced in end-to-end feature delivery across API design, implementation, testing, release, and legacy modernisation in lean product environments. Grounded in object-oriented design, SOLID principles, clean code, refactoring, and test-driven development, with strong ownership in complex product delivery.

WORK EXPERIENCE

Full-Stack Engineer Nov 2024 – Present
MHR | Nottingham

- Deliver end-to-end product features on PeopleFirst across implementation, testing, release, and iterative improvement.
- Build back-end services and REST APIs with Java and Jakarta EE, alongside front-end features in Angular and TypeScript.
- Own a complex feature area with dynamic, user-configurable components, shaping sprint plans, MVP scope, and delivery.
- Support QA onboarding and surface legacy issues early to reduce delivery risk and improve planning quality.
- Contribute to an Angular routing migration enabling lazy loading, better perceived performance, and removal of deprecated tooling.
- Apply OOP, SOLID, clean code, testing, refactoring, and performance optimisation across delivery work.
- Support AI-assisted development at MHR using Copilot, Codex, and Claude.

PROJECTS

ExamGenie
A client-commissioned full-stack learning platform built with TypeScript, React, Node.js, and PostgreSQL/Supabase, with multi-role access, protected routes, relational data design, and PostgreSQL / PLpgSQL remote procedure calls.

Portfolio Site
Portfolio application built with Angular, TypeScript, and Tailwind CSS, using native Angular routing and responsive UI components to showcase projects, skills, and technical experience.

SKILLS

Java

Jakarta EE

REST APIs

TypeScript

Angular

React

Node.js

SQL Server 2022

PostgreSQL

Supabase

OOP

SOLID

TDD

Git

Azure DevOps

GitHub Copilot

EDUCATION

AI Application Development Pathway Jun 2026 – Present
Microsoft Learn

- Currently studying generative AI application development through Microsoft Learn.

Level 4 Software Developer Apprenticeship Nov 2024 – Apr 2026
Digital Native / BCS | Distinction

- Completed alongside commercial software engineering work at MHR.

Software Development Bootcamp Mar 2024 – Jul 2024
Northcoders

- Full-stack software development covering JavaScript, Node.js, React, REST APIs, PostgreSQL, and test-driven development.

University of Edinburgh Sep 2014 – Jun 2018
BSc (Hons), Applied Sport Science | First Class

CERTIFICATIONS

Level 4 Software Developer Apprenticeship, Digital Native / BCS Distinction	Apr 2026
freeCodeCamp, Algorithms and Data Structures	Jan 2024
freeCodeCamp, Responsive Web Design	Jan 2024
Google, IT Support Specialisation	Jun 2023
